Test report n°: **24LA04563** of **26/03/2024**

Dear
CBS MEDICAL SRL
Via dell'Industria, 50
36035 Marano Vicentino (VI)

Acceptance Data

Subject of the test: **Generic Material**

Transport: **Customer**

Date of arrival: **11/03/2024** Time of arrival: **13.10**

Acceptance date: **11/03/2024**

Sample data

Description: **PERMANENT WASHABLE ANTIBACTERIAL MAT**

Sampling data

Sampling by: **Customer**

Place: **Customer location**

The analytical results are exclusively referred to the sample.
Representation of a Test Report signed electronically in accordance with current legislation.

This document can not be reproduced in part without the written permission of the laboratory.

Laboratory management system certified UNI EN ISO 9001: 2015 by CertiEuro srl with the No. 20466Q. Recommended by AIC for the analysis of quantification of gluten in food matrices. Registrated laboratory for the analysis of food contact materials intended for export to Japan.
Laboratory registered in the list of regional laboratories carrying out analysis in the context of self-control procedures for Food Industries No. 52. It is the responsibility of the OSA to communicate the warnings to the bodies in charge

3A Laboratori SRL - The tests are performed at the registered office

At - Count bacteria recovered from the treated samples 24 hours post inoculation	log	**NQ**	0,4		12/03/2024 14/03/2024

If the sampling is not the responsibility of 3ALaboratori srl, the latter declines all responsibility with regard to sampling information as provided by the Customer; the results refer exclusively to the object tested unless otherwise specified in this Test Report. When these data include measurements that affect the measurement unit, the results expressed are obtained by processing them. The Acceptance Data is the responsibility of the Laboratory while the sample data are the responsibility of the Customer. If the sample is not suitable but the Customer chooses to continue anyway, the laboratory declines all responsibility for the results that could be influenced by the deviation. Unless otherwise indicated in the Test Report, the Laboratory applies the following decision rule for the evaluation of conformity from a limit: in the event that, taking into consideration the measurement uncertainty, the conformity of the result is not unequivocal, the Laboratory has decided to determine it through the direct comparison between the result obtained and the reference value, not considering the measurement uncertainty. The probability of false acceptance is less than 50%.

LEGEND: **U.M.** = Unit of measurement; **(Sup)** = upper limit; **(Inf)** = Lower Limit ; **LoQ** = limit of quantification, it is the lower limit of concentration above which it is possible to obtain a quantitative measurement instrumentally; in microbiology the LoQ is of a theoretical nature; **LoD** = limit of detectability, is the lower limit of concentration below which the sample cannot be detected; in qualitative analyzes it represents the minimum concentration at which an analyte can be determined or not; **NQ** = unquantifiable, indicates a value less than LoQ; **NR** = not detectable, indicates a value lower than LoD;"**<x**" or "**>x**" respectively indicate a value lower or higher than the measuring range of the test, where x is the result

(s.s.): Parameters with the designation "s.s." they are determined or recalculated on the dry matter.

The analytical results are exclusively referred to the sample.
Representation of a Test Report signed electronically in accordance with current legislation.
